

## Service Documentation

### Class : bobby.DAODConnection

URL	Method	Return Type	Parameters	Class Annotations	Method Annotations
	getConnection	java.sql.Connection			

### Class : bobby.Student

URL	Method	Return Type	Parameters	Class Annotations	Method Annotations
	getName	java.lang.String		CreatePOJO	
	setName	void	java.lang.String arg0	CreatePOJO	
	setGender	void	java.lang.String arg0	CreatePOJO	
	getGender	java.lang.String		CreatePOJO	
	getRollNo	int		CreatePOJO	
	setRollNo	void	int arg0	CreatePOJO	

### Class : bobby.StudentAction

URL	Method	Return Type	Parameters	Class Annotations	Method Annotations
/studentAction/add	add	java.lang.String	bobby.Student arg0	Path CreateService	Path Post
/studentAction/update	update	void	bobby.Student arg0	Path CreateService	Path Post
/studentAction/getAll	getAll	java.lang.String		Path CreateService	Path Get
/studentAction/delete	Delete	void	int arg0	Path CreateService	Path Post
/studentAction/getById	getById	java.lang.String	int arg0	Path CreateService	Path Get
